

show-set link overwrites link styling in ref

```
1 show: make-glossary
2 show ref: ...
3 show link: set text(fill: red)
```

glossarium: Neural Network (NN)

a more specific show link rule prevents overwriting unwanted links

```
1 show: make-glossary
2 show ref: ...
3 #show link: it => {
4   if type(it.dest) == str {
5     text(fill: red, it)
6   } else {
7     it
8   }
9 }
```
